ACE

A lot of times we see employees who have spent a considerable time in the same organization, rigid to learning and change. Derived from the inspiring story of Musa AS, ACE is a program developed to instill a learning-mindset in the participants and empower them to embark on a lifelong journey of personal and professional growth.

The facilitator pitches heavy questions, engages the audience in carefully crafted fun learning exercises and sensitizes them to the extent that they first accept the need to learn and then commit to lifelong learning. The participants are equipped with a practical framework- ACE that enables them to work on their personal and professional development.
